DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/05/2005 has been entered.

2. The Amendment and Terminal Disclaimer filed by Applicants on 07/19/2005 has been entered.

Response to Amendment/Arguments

3. Applicant's amendment and arguments filed on 12/05/2005 have been fully considered and they are found persuasive.

4. The rejection of claims 11-13 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over all claims of U.S. Patent No. 6,624,212 is withdrawn.

Art Unit: 1713

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamilton et al., U.S. Patent No. 6,730,734 (hereinafter "Hamilton"). Hamilton teaches impact modifiers, mineral oil and plastics resins. See Hamilton, col. 2, line 42 through col. 6, line 25. The impact modifiers disclosed in Hamilton are rubbery polymers incorporated in the claimed ranges

Art Unit: 1713

and the plastic resins are high Mw polymers. See cols. 10-11.

Hamilton teaches the use of processing aids such as PARALOID K-120N (a trademark of Rohm and Haas), which is a high molecular wt. MMA copolymer.
